

Advanced Benefits Advisors

Payroll and Timekeeping Services

Delivering payroll services on a Millennium platform, with unparalleled functionality & customer service.

Seamless data integration with the ABA System™

Reducing the cost of labor with a wide variety of timekeeping services.

Payroll: Advanced Benefits Advisors delivers their clients a comprehensive web-based payroll solution with powerful reporting capabilities & second-to-none functionality. ABA's web payroll solution runs on a Millennium platform, which is industry recognized for its formidable capabilities.

Data Integration: With the ABA System™ transferring new hire information, demographic changes, benefits payroll withholdings and terminations directly from the ABA System™ to the payroll database saving our clients time, increasing convenience and reducing errors.

Timekeeping: ABA can also provide timekeeping solutions, to help ABA clients significantly reduce their labor costs. By reducing the amount of human error & virtually eliminating 'keying-in' payroll data, ABA clients could see their labor costs come down by up to *8% (*recent American Payroll Association study). Timekeeping solutions will also reduce legal liability by reducing exposure to Department of Labor audits – which have been on an increase lately.
